ABOUT US

Who we are

Dambadeni Builders (Pvt) Ltd was established in 2018 as a civil and electrical works contractor. Over the years we have taken on demanding projects and built deep skills and know-how in design-and-build solutions, panel board wiring, single- and three-phase wiring, and the wider building trades and related engineering works.

Today we act as main contractor for small to medium-sized projects, and provide project management services that coordinate specialist trades on industrial and commercial work. We also offer design input and engineering solutions as value-added services to our clients.

"Our objective is to give every client an "I am assured" experience – with clear communication and follow-through that keep the client's objectives our top priority."

2018

Year incorporated

50+

Strong site workforce

10+

Years of electrical industry experience in our leadership

2

Chartered engineers on our team

OUR VISION

To be a respected civil and electrical contractor, delivering beyond expectation – always.

OUR MISSION

To procure at competitive prices, provide safe working conditions and deliver quality work within a reasonable time frame.

WHAT WE DO

Our services

General contractors — civil and electrical — and suppliers, from a single dependable team.

01**Building & commercial construction**

All types of buildings and commercial construction, including major upgrading works.

02**Land & building development**

Building and land development projects, from groundwork through to completion.

03**Water supply & sanitation**

Water supply and sewerage works, including large-scale pipe laying and HDPE pipe jointing.

04**High & low voltage electrical**

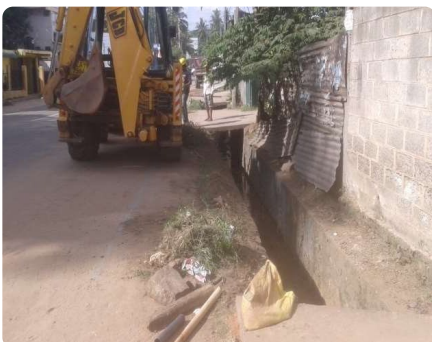

High-voltage and low-voltage electrical line works, supervised by experienced electrical engineers.

05**Panel boards & wiring**

Panel board wiring plus single-phase and three-phase wiring for buildings and industrial use.

06**Design, build & project management**

Design input, engineering solutions and coordination of specialist trades on industrial and commercial projects.

Trenching, water supply project

Excavation works

Building works, Siri Medura Villa

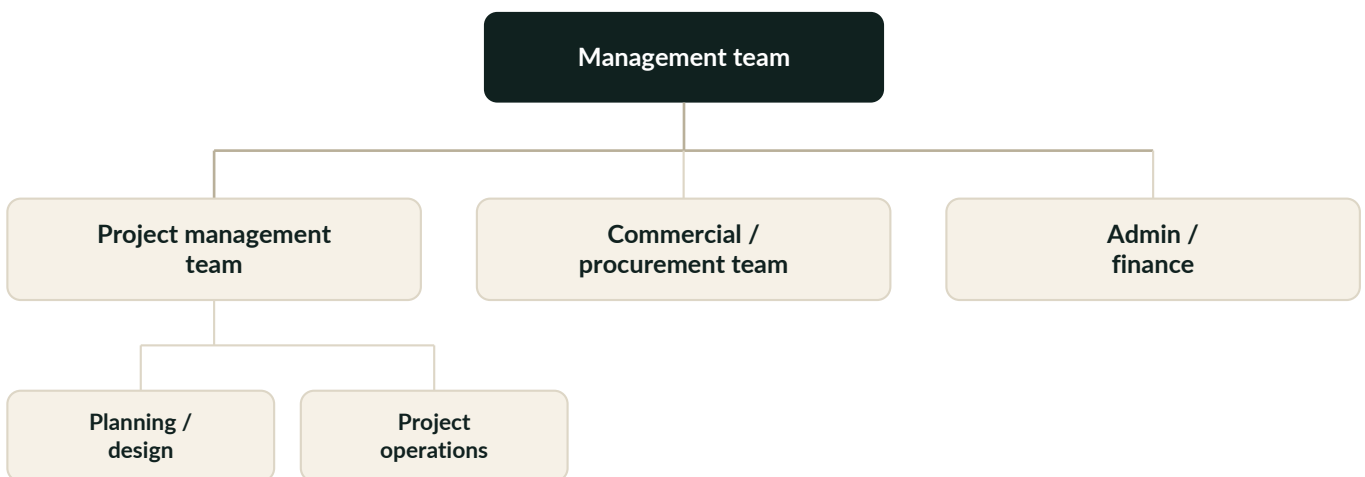

HOW WE WORK

Our approach

- 1 Plan**
Create a detailed schedule and resource plan to meet the client's project objectives.
- 2 Communicate**
Communicate clearly with every project stakeholder.
- 3 Track**
Track project progress and fine-tune any deviation early.
- 4 Supervise**
Supervise closely on the quality of the work done.
- 5 Deliver**
Complete and commission the project on time.

OUR ORGANISATION

How the team is structured

Our management team

The business is driven by our working director, who brings more than 10 years of experience in the electrical industry alongside experience in business development, procurement, project management and company administration. The management team gathers feedback proactively, watches for changes in the business environment, reviews work processes, and shares key learnings and company policy with all staff at regular meetings.

OUR PEOPLE

The people behind the work

WORKING DIRECTOR

Mr. N.P.S.P. Pathirana

Leads the business with 10+ years in the electrical industry and hands-on responsibility for procurement, project management and administration.
